

INDUSTRY AND CITY GAS EQUIPMENT

City Gas Gate Station

Skid-mounted metering and pressure regulation station purpose-built for city gas supply. It performs filtration, heating, pressure regulation, metering, and odorization before delivering gas to residential or industrial users.

LNG Supply Station

Designed for distributed supply to LNG users. Gas is delivered to end users after gasification, heating, pressure regulation, metering, and odorization. The station typically includes an LNG storage tank, vaporizer, heater, pressure regulation system, and odorization and metering systems, etc..
